Terms and Conditions

DEFINITIONS

ESC – Energy Solutions Centre

HRV – Heat recovery ventilator

MUB – Mixed-use building

MURB – Multi-unit residential building

MURB CEA – MURB-qualified Certified energy advisor

NRCAN – Natural Resources Canada

ELIGIBILITY: Owners or lease holders of MURBs or MUBs in Yukon. Limit of one MUB rebate per building per year. MURBs are low-rise buildings of purely residential occupancy that consists of a set of separate stacked residential units, with each residential unit having a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. Row houses meeting these requirements are not considered to be MURBs and may be eligible for the Existing home insulation rebate. Houses and houses with secondary suites do not qualify as MURBs. Mixed-use buildings (MUBs) are eligible but primary use of space must be for residential purposes (50% or more of floor space must be residential).

Products, projects and services must be installed in Yukon. Receipts and invoices must be dated within one year of rebate package submission to ESC. Appliances and products must be new. Second-hand appliances and products are not eligible for the rebate.

ASSESSMENT REBATES are calculated at 40% of assessment cost to the rebate maximum (\$1,500 for pre-retrofit and \$300 for post-retrofit assessments). MURB assessments must be performed by an NRCAN-certified MURB CEA. The Yukon government encourages communities outside of Whitehorse to participate in the Good Energy program by offering a reimbursement to CEAs for travel costs to communities. To qualify, CEAs must contact the Energy Solutions Centre and make arrangements prior to travelling to Yukon communities.

The **INSULATION REBATE** is calculated based on the exterior surface area of the insulated component(s) and whether the renovation was a basic (\$0.50 / sf) or a high performance upgrade (\$2.00 / sf). Components must be part of the thermal enclosure and have an exterior surface area. Eligible components include exterior facing walls, ceiling, slabs and floor systems, basement & crawlspaces walls and rim joists. The addition of R-10 to R-19 (nominal) to a component qualifies as a basic upgrade. The addition of R-20 (nominal) or greater to a component qualifies as a high performance upgrade. Twenty percent or more of a component's exterior surface area must be insulated in order to qualify for the insulation rebate. **A pre-retrofit assessment must be completed to qualify for the insulation rebate.**

The **HRV REBATE** is calculated at \$500 per HRV to a maximum of \$4,000. HRVs must be HVI-certified and meet or exceed a sensible recovery efficiency of 64% at an outside winter design temperature of -25°C at principal flow rates. Applicants must submit an HRV balancing report.

WINDOWS AND DOOR rebates are calculated at \$100 per unit to a maximum of \$2,000 (20 unit maximums). Applicants must provide [ENERGY STAR Zone 3](#) documentation from vendor/contractor for each **window & door** installed. If claiming windows and/or doors purchased by the contractor, the **applicant** must provide an itemized receipt/invoice issued to the applicant from the contractor or a signed summary sheet by the contractor or supplier attributing receipts/invoices in question to the applicant. **Windows and doors must be for residential use only.**

To qualify for the **MATERIALS & COSTS SHEET REBATE** the client must submit a summary detailing material, labour and/or supplementary costs associated with the renovation. Cost data will be used to evaluate program effectiveness and identify cost- and energy-optimal renovation pathways for MUB renovations. Cost data will be used anonymously and in aggregate. Only applicants **qualifying for insulation rebates are eligible for the Materials & costs worksheet rebate.**

RECEIPTS AND INVOICES: Receipts and invoices must be legible, itemized and include: purchase date, purchaser name, retailer/supplier name, brands and model numbers of items purchased, description, and cost of individual components. **Invoices must have a zero balance or be noted "Paid in full" and initialed by the contractor.**

LIMITS TO PROGRAM: The Good Energy program is renewed annually pending fiscal year budget allocation. Rebate offers are subject to program funding and revision and may change or end at any time. In no event will a rebate amount exceed the product, project or service value.

SUBMISSION AND PAYMENT: ESC is not responsible for lost, late, incomplete or ineligible submissions. Please allow up to eight weeks for payment. Payment may be direct deposit if you have been employed or under contract with Yukon government.

QUALIFYING PRODUCTS: ESC relies on third-party standards to identify and validate energy efficient products, projects and services. ESC does not endorse any particular manufacturer, supplier, contractor or installer in promoting these third-party standards.

ENERGY INFORMATION RELEASE: The applicant acknowledges that ESC keeps program information about services provided and the applicant's resulting energy savings as confidential, but

will use data in aggregate in reports and other documents. ESC adheres to ATIPP and Archives Acts. Applicants may be contacted by phone or email to participate in a voluntary questionnaire regarding program impact and opportunities for program improvement.

DISCLAIMER / NO LIABILITY: The applicant understands that ESC's role is to incentivize the purchase of energy efficient products, projects and services. ESC is not responsible for product installation, the quality of work or service by a contractor, the completion of projects or the quality of products purchased. ESC does not guarantee energy saving results by approving an application. ESC is not responsible for retailer claims about the Good Energy program, program rebates and product eligibility.
